Deaf Students And The  
Qualitative Recent research reveals,  
however, that deaf students acquire  
language structures, produce  
errors, and employ strategies in the  
same fashion as younger hearing  
students, though at later ages. The  
ability of all students to learn  
language and literacy skills in a  
similar manner at different stages  
forms the foundation of the  
Qualitative Similarity Hypothesis  
(QSH). Deaf Students and the  
Qualitative Similarity Hypothesis  
... Sign language interpreters often  
offer the primary avenue of access  
for deaf and hard of hearing  
students in public schools. More  
than 80% of all deaf children today  
are mainstreamed, and few of their

Read Online Deaf Students And The Qualitative Similarity Hypothesis Understanding Language teachers sign well enough to

provide them with full access. As a result, many K-12 interpreters perform multiple roles beyond interpreting. Project MUSE - Deaf Students and the Qualitative

... Recent research reveals, however, that deaf students acquire language structures, produce errors, and employ strategies in the same fashion as younger hearing students, though at later ages. The ability of all students to learn language and literacy skills in a similar manner at different stages forms the foundation of the Qualitative Similarity Hypothesis (QSH). Deaf Students and the Qualitative Similarity Hypothesis One view, called the Qualitative Similarity Hypothesis (QSH), hypothesizes that deaf

children go through the same

process as hearing children do but  
at a delayed rate (Paul, Wang, &

Williams, 2014... Deaf students and  
the qualitative similarity hypothesis

... In this book we primarily focus on  
critiquing the validity of the QSH

and its implications for the

development of English language

and literacy in children and

adolescents who are d/Deaf and

hard of hearing (d/Dhh). The use of

the phrase d/Deaf and hard of
