Metallurgy Lecture ... Metallurgy is a domain of
materials science and engineering that studies the
physical and chemical behavior of metallic elements,
their inter-metallic compounds, and their mixtures,
which are called alloys. Metallurgy encompasses both
the science and the technology of metals. That is, the
way in which science is applied to the production of
metals, and the engineering of metal components used
in products for both consumers and manufacturers.
Metallurgy is distinct from the craft of
metalworking. Metallurgy - Wikipedia Metallurgical
engineers produce materials that power our bodies and
our world, forging advances in materials development
that impact nearly every aspect of modern life. We
transform the earth's mineral resources into advanced

alloys used in surgical implants, computer chips, superconductors, automobiles, and aircraft. Materials and Metallurgical Engineering Degrees & Options.
