P.S sorry I didn't click pictures when i did this mod. Step 3: ... How to Add Hazard Light With Switch for Scooter/bike : 4 ... Identify the green/purple wires on the Hazard Light Switch. Connect one green/purple wire to terminal 'B' on the flasher unit and the other green/purple wire to the feed wire for the indicator flasher unit. 4. Locate the indicator wiring connectors on the car. Fitting Instructions: Hazard Warning Light System There is a simple way to equip almost any car with trafficators to perform a hazard operation. All that is needed is a simple single pole switch, mounted within reach of the driver. Locate the left and right turn feed wires and connect one wire from the switch to the left feed wire, and the other switch lead to the right turn feed wire. How to Add Hazard Flashers - Moss Motoring Installing an emergency vehicle light is usually simpler than a structural emergency light. In which case, the first part of the process is to connect your wiring to the car battery. This can be a complex process and once again, you may require a professional, but today the market is heavy with do-it-yourself models which create a simple switch, one with tape-sealed wires that go to positive and negative. How to Install Emergency Lights | LED Equipped combined brake/flasher lights. These original wiring diagrams have the wiring for Emergency 4 way flasher added. For this the available LUCAS Hazard Warning switch (7 Way Switch; 2 opening contacts, 5 closing contacts + separate Flasher Relay for 4 way flashing + Hazard Warning Light in knob of switch) is used.

Features: Four Way Flasher Now wire it in like this. (This version uses a 4 wire into 3 wire converter. For a 3 wire into 2 wire converter, just take the tail light wire past it.) Hey, what about hazard lights? No problem, you just need another toggle switch and flasher unit. The toggle switch is different than the other though...
