Mapping OpenStreetMap This book

demonstrates how to create distributed Java applications with GPS clients and map servers to simulate a GPS Tracking System (GTS). Besides introducing basics of GPS and cartography the book describes how to process digital map data for dedicated applications with A Map Compiler for OpenStreetMap. The reader can set up his own map compilation process to create his individual Physical Storage Format (PSF) with different layers (map, admin, network) for offline navigation and much more. Books - OpenStreetMap Wiki The OpenStreetMap (OSM) project is one of the most well-known and studied VGI initiatives. It has been studied to identify its potential for different applications.
