alike. Amazon.com: Sintering Theory and Practice eBook: German ... Sintering or frittage is the process of compacting and forming a solid mass of material by heat or pressure without melting it to the point of liquefaction. Sintering happens naturally in mineral deposits or as a manufacturing process used with metals, ceramics, plastics, and other materials. Sintering - Wikipedia For porous bodies compacted from metal powders, the phenomenological theory of sintering is capable merely of taking into account the so-called "geometrical" factor, which controls the rate densification, and to reduce the problem of sintering kinetics (in particular, densification kinetics) to a study of the
