a gross profit target is set at 70%, the food costs as a percentage of the selling price can only represent 30%. It is important to note that the selling price is ... Selling Price: Concept, Formulas, Solved Examples ... How The C Price Affects Producers. A farmer's production costs have nothing to do with C price fluctuations, and producers usually have very small profit margins. So when the C price dips, it can very easily put a farmer in the red. This even applies to those selling at a rate that's a significant percentage premium above the C price. Rethinking The C Price: Should We Change How We Price ... For example, if the company needs a 15 percent profit margin and the break-even price is \$2.59, the price will be set at \$3.05
